PEAKWORKS^{INC.}

AERIAL PRODUCTIVITY EQUIPMENT & TRAINING

RFID Inspection System

PeakWorks RFID Inspection system is a fast, easy and reliable way to perform inspection on your PPE. All of our products have been manufactured with RFID enabled chips. At the manufacturing plant we have programmed the RFID chips with the specific product information such as Product#, Date of Manufacture, Serial # and related product standards. As a PeakWorks customer, you will receive email announcements letting you know when a particular product is due for inspection.

3P *PeakWorks Protection Program*

The PeakWorks Protection Program combines the fall protection equipment along with the training, inspection, cleaning and maintenance of the equipment into a convenient monthly fee for each worker. Programs are tailored to each client's situation by evaluating the size of the workforce, employee turnover, the work environment and the unique inspection requirements. With our protection program, you are not purchasing fall protection equipment, so there are no high start-up costs.

Why Clean Your PPE?

Cleaning and inspection of PPE (Personal Protective Equipment) are essential services that could prolong the life of your equipment many times over. Cleaning and inspection will ensure that your equipment will be ready if the need arises. PeakWorks offers a hassle-free approach to the cleaning and inspection of your PPE. Our team of experts can clean and inspect your PPE fast and conveniently - usually within a week. Our non-evasive cleaning process does not weaken reflective materials, stitching or seams. The colours of your items will not fade nor will delicate materials such as leather be ruined.

Training

PeakWorks offers a wide variety of training courses from introductory courses to competent person certification and industrial rescue. Let PeakWorks design a training program to suit your needs.

Engineered Services

A well designed fall protection system should protect the worker from the hazard while at the same time not hindering their ability to complete the task at hand. Let PeakWorks specialists show you how a well designed fall protection system can work for your organization.

Other Services

PeakWorks also provides recertification programs, audit, and productivity gains, decreased down time and a cost-benefit analysis in order to facilitate compliance with law C21.
