

# Halo

EYE/FACEWASH

**Introducing Halo™**  
the most effective  
washdown protection.

In an emergency, you want an eye/facewash unit that provides the most coverage. With HALO, you get the best on the market—covering 85% of the average user's face. That's more than 20% better than any other unit.

With more coverage and a superior wash pattern, HALO users experience the most effective contaminant relief available. HALO sets a whole new industry standard—creating a whole new dimension in safety.

# 85% Facial coverage

# 20% Better protection than other eye/facewashes

- 1 Enhanced dust cover design** in clear translucent yellow allowing for easy inspection. When the cover is opened, water flow starts automatically – giving the user instant relief.
- 2 New ergonomic hand activation paddle** is easy to reach from any direction
- 3 Separate supply and waste pipes** to eye/face wash are an industry first and Bradley exclusive! Meets US and European plumbing requirements.

- 4 The Aquaduct™ design** is the only self-draining design for standard eyewash models – another industry first and Bradley exclusive. The self-draining Aquaduct helps reduce the risk of bacteria growth when unit is not in use. **Integral strainer** inside the Aquaduct reduces debris in the water for additional eye protection and also prevents clogging.
  - 5 New dust cover caps** on the eyewash are hinged for a more secure hold – keeping dust and debris off the water spouts.
- Anti-microbial protection** protects the eyewash and eye/facewash heads.
